--SUMMARY OF THE INVENTION--.

Please amend the paragraph spanning pages 1 and 2 as follows:

~~It firstly proposes~~ In one embodiment, the present invention provides a radiation heating structure, comprising at least:

- a heating layer comprising at least one electrical resistor intended to be electrically powered in order to produce Joule heating;
- a radiating layer, comprising predominantly radiating additives; and
- a substantially thermally insulating layer, the insulating layer and the radiating layer being placed on either side of the heating layer.
